12. EXAMPLE RUNS - REVISED

Illustrative outcomes, not forecasts. Arrival prices, booms/busts, mission offers and encounters are randomized. Check live prices and keep credits for fuel, repairs and bribes. Legal cargo avoids contraband scans, but does not prevent pirates.

Example 1: Legal Starter Triangle - Two Jumps, Conditional Prices

Start at ASTERION with 1,600cr, fuel100, weapons1 and ECO1. Buy 15 Nickel at23 and 15 Water at26: spend735cr, cash865cr, hold30/30. Jump to MIRRORGLASS costs13 fuel. Pirate chance is about12.9%: 1*(0.08-0.006-0.008)+675/14000+0.015. The 2% minimum is not this route's actual chance.

If arrival sell prices are Nickel28 and Water30, proceeds870cr give cash1,735cr. If Pods cost215, eight cost1,720cr, leaving just15cr: an exposed position with no useful emergency reserve. Buy fewer when needed. At ECO1, KARTH costs25 fuel; if all eight Pods sell at310, cash becomes2,495cr. Cargo upgrade1,160cr leaves1,335cr and capacity48. Trading gain895cr before the upgrade; cash change after it is -265cr. Assumes no encounter costs or refueling; fuel ends62.

Example 2: Smuggling - High Reward, Conditional Success

With cash4,000cr, ECO2 and fuel80, accept a five-Map contract to BASILICA only if offered: wanted+1. Travel via NADIR costs29 then14 fuel. If Maps cost286, five cost1,430cr, leaving2,570cr before encounters. At law5/wanted1, carrying contraband gives a49% scan chance. A police bribe costs425+110+round(1430*0.55)=1,322cr, with56% success. If accepted and destination sell price is540, completion pays5,400cr: final cash6,648cr, REP+2, fuel37. Assumes no other costs. Failed bribery can lead to fines and seizure; pirate evasion at NADIR with ECO2 is42%, not49%.

Example 3: Mission Completion and Old Saves

V2 excludes newly offered missions targeting the current port and purges stale available entries. For an active delivery of11 Micro Reactors to MIRRORGLASS, carry11 and dock there before COMPLETE. If you hold3, buy8 more. Payout uses the destination's current sell price: at115, round(11*115*1.25)=1,581cr. That price and payout are illustrative; deadlines decrease on each arrival.
